

# Design Your Success at the ARC

## Academic Advising

When you have questions about your future at MassArt, whether that is about which class to take, which major to pursue, or what to do if you get off track with a class, Advisors can provide valuable guidance.

## Success Coaching

Staying on top of your projects and homework assignments can be challenging, so it is important to practice good time management. Success Coaches in the ARC are available to meet with students each week to learn study skills and develop plans for getting it all done.

## Writing Specialists

Writing Specialists work with students to develop written communication skills that support students' success throughout MassArt and beyond. All college related writing projects are eligible to be reviewed by a specialist. In addition, our writing specialists have experience working with students whose first language is not English.
